

HEIA(Q) 2010 World Home Economics Celebration

The Home Economics Institute of Australia (QLD) takes great pleasure in inviting you to:
A Celebration of World Home Economics Day

The celebration will include a toast to World Home Economics Day, an exploration of the new Queensland Food Literacy Project, presentation of the 2010 O'Malley scholars and a delicious brunch.

Guest speakers Helen Vidgen and Dr Danielle Gallegos of QUT School of Public Health will outline the exciting new Food Literacy project that seeks to identify the food literacy skills required by young people to improve nutritional practices. The presentation will explore the interaction between food literacy skills and healthy eating behaviours and propose a set of recommendations regarding critical success factors for strategies that can improve food literacy competencies in young people. The project will be of great interest for all home economists.,

After the celebration, guests are invited to stay for the HEIA(Q) Annual General Meeting.
